DETAILED ACTION

1. Regarding claims 8, 9, and 16: The examiner interpreted the limitation “A computer program product” as a storage device (e.g., CD-ROMs or compact disk-read/write) for storing electronic instructions.

Claim Objection

2. Claims 2-6, 9, and 11-14 are objected to because of the following informalities:

Regarding claims 2-6, line 1, change “A device” to --The device--

Regarding claim 9, line 1, change “A computer program product” to --The computer program product--

Regarding claim 11-14, line 1, change “A system” to --The system--

Appropriate correction is required.

Claim Rejections - 35 USC § 103

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claims 10-16 are rejected under 35 U.S.C. 103(a) as being unpatentable over Gardner et al. (US 7454002).

Regarding claim 10: Gardner et al. disclose integrating personal data capturing functionality into a portable computing device and a wireless communication device comprising a global positioning system (GPS) module for measuring a geographical location of a user or a speed of a user, and a mobile telecommunications device having an active communication link,

Art Unit: 2612

in use, with the GPS module, the mobile telecommunications device being updated regularly with the position of or speed of the GPS module (col. 6, lines 10-16). Gardner et al. do not specially disclose the mobile telecommunications device being provided with computer program means for calculating, from said position or speed, an exercise level of the user in terms of aerobic capacity. Since Gardner et al. teach a computer program (col. 6, lines 39-48), and the information concerning their exercise level (col. 1, lines 50-53), it would have been obvious to the skilled artisan to recognize that the device of Gardner et al. does have the computer program means for calculating, from said position or speed, an exercise level of the user in terms of aerobic capacity.

Regarding claim 11: Gardner et al. disclose a remote monitoring computer in communication with the telecommunications device, said computer being adapted to receive and process exercise data received from said telecommunications device over a mobile telecommunications network accessed by the telecommunications device (fig. 1A, col. 4, lines 10-16 and 54-60).

Regarding claim 12: Gardner et al. disclose wherein the GPS module is integral to the telecommunications device as shown in figure 1C.

Regarding claim 13: Gardner et al. disclose wherein the GPS module is provided as an accessory for the telecommunications device (see fig. 1C).

Regarding claim 14: Gardner et al. do not disclose wherein the GPS module is a separate GPS unit sharing a compatible communications link with the telecommunications device. Since Gardner et al. teach the use of the GPS unit (figure 2), it would have been obvious to one of ordinary skill in the art to modify the system of Gardner et al. to have the GPS module

Art Unit: 2612

is a separate GPS unit sharing a compatible communications link with the telecommunications device if desired because they perform the same function.

Regarding claim 15: All the claimed subject matter is already discussed in respect to claim 10 above.

Regarding claim 16: All the claimed subject matter is already discussed in respect to claim 10 above.

Allowable Subject Matter

5. - If applicant can overcome the objection above, it appears claims 2-6, and 9 would be allowable.

- Claims 1, 7, and 8 are allowed.

Conclusion

6. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Phung T Nguyen whose telephone number is 571-272-2968. The examiner can normally be reached on 8:00am-5:30pm Mon thru. Friday.
